

## Project Design Phase-II Data Flow Diagram & User Stories

Date	03 October 2022
Team ID	PNT2022TMID24462
Project Name	Project - IOT Enabled Smart farming application
Maximum Marks	4 Marks

### Data Flow Diagrams:

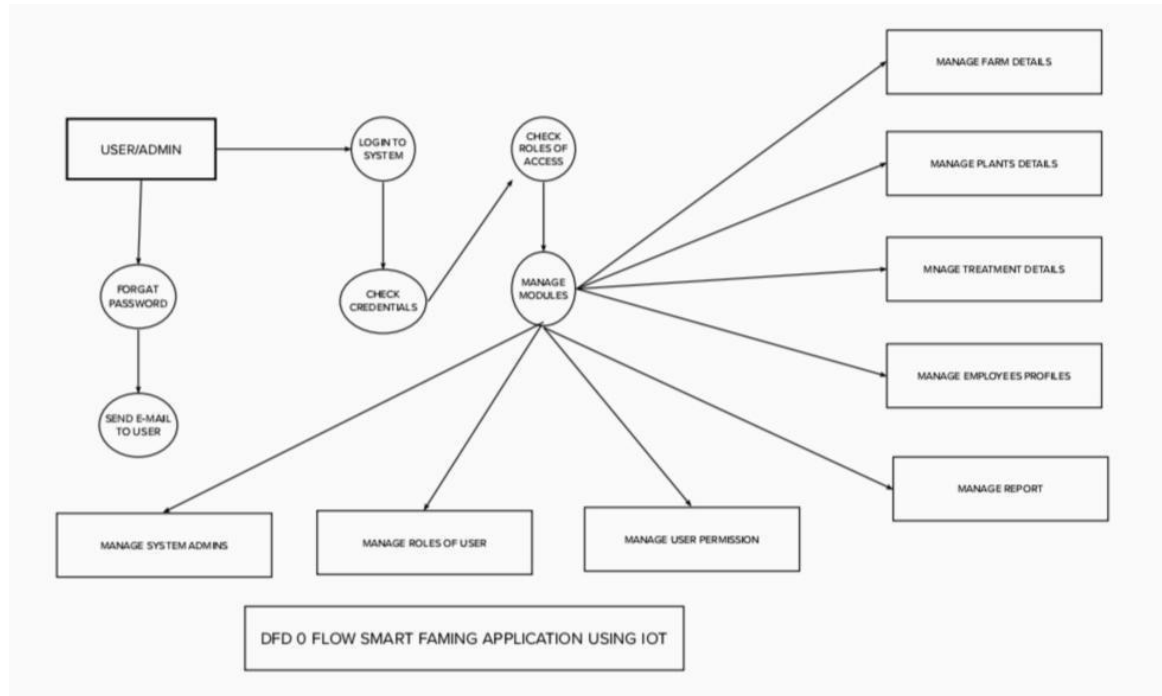

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

### Example:

## Example:

DFD Level 0 (Industry Standard)

Different sensors are used to measure the various soil factors, including temperature, soil moisture, and humidity. The measured data is then saved in the IBM cloud.

- The Aurdino UNO is utilised as a processing unit for the data gathered from the sensors and weather API.
- The hardware, software, and APIs are written using the programming language NODE-RED. The communication adheres to the MQTT protocol.
- A mobile application created with MIT App Inventor is used to deliver all the collected data to the user. Depending on the sensor results, the user might decide via an app whether to irrigate the crop or not. They are able to remotely control the motor switch by utilising the app.

## User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail		Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password		High	Sprint-1
	Dashboard					
Customer (Web user)		USN-6	As a User can view the dash board ,and this dashboard include the check roles of access and then move to the manage modules.	I can view the dashboard in this smart farming application system	Medium	
Customer Care Executive		USN-7				
Administrator			As a user once view the manage modules this describes the Manage system Admins and Manage Roles of User and etc..
